PROFESSIONAL EXPERIENCE

Supermicro

San Jose, CA

AI Product Manager / Solution Engineer

01/2024 – Present

Enterprise AI Agent

- Identified inefficiencies in internal sales workflows, initiated and launched an **E2E RFQ AI agent** for datacenter infrastructure recommendations. Improved sales efficiency by 7.2x and increased deal win rate to 23%.
- Owned product strategy and roadmap (multimodal inputs, sub-agent routing, guardrails), balancing **latency, accuracy, and scalability** cost tradeoffs. Achieved 98% recommendation accuracy in production.
- Established success metrics, observability, and evaluation frameworks (auto-testing, tracing, RCA), enabling **data-driven iteration** and accelerating feature releases like multimodal and RAG retrieval.
- Prioritized RAG strategy to reduce hallucination of GPU-related values to meet 95% recommendation accuracy.
- Identified latency as an adoption blocker through user feedback; drove **inference optimization** with MLEs (vLLM batching/caching), reducing response time by >50% on B200 clusters and improving user adoption.

B2B Customer-Facing Programs

- Spearheaded **large-scale GPU**-accelerated supercomputing cluster programs as technical point-of-contact with cross-functional teams, partnering with NVIDIA and AMD to deliver and scale **\$2B+** solutions.
- Identified emerging **AI/HPC** opportunities via early engagement with government and research labs, translating requirements into workloads and infrastructure architectures for LLM training/inferencing, and aligning technical and business readiness, contributing to >15% win rate.
- Built reference architectures, design patterns, and deployed 2 AI POCs on **NVIDIA Cloud** to validate workloads (Demos: Enterprise RAG & Video Search), accelerating customer adoption and solution scalability.

Renogy

Los Angeles, CA

Associate Product Manager

09/2022 – 09/2023

- Led a cross-functional team of 15 through full product lifecycle of a smart control panel from ideation, MVP R&D, GTM, to iteration. Achieved 2.3m landing page PV and \$600K sales volume within 2 months of launch.
- Redesigned pricing & subscription plan based on user behavior analysis, growing subscribers by 27%.
- Synthesized 20+ user pain points from community forums, reviews, and CRM data into requirements backlog.
- Designed 10+ new product training and demos for Sales & MKT teams, bridging R&D and business.

Bytedance

Beijing, CN

Product Manager Intern

02/2021 – 08/2021

- Designed curriculum and GTM strategy for a pre-K app, and conducted A/B testing to validate optimal solutions. Accumulated 11.2M followers and 210K paying users with \$428 ARPU within 6 months via Douyin distribution.

TCL Corporation

Shenzhen, CN

Product Manager Intern

09/2020 – 02/2021

- Improved smart home control features. Drove 7% app download rate via ASO/SEO, and 408k users to 430k.

Tencent

Shenzhen, CN

Product Operation Intern

06/2020 – 09/2020

- Promoted a K12 app through content marketing. Grew 46k followers and 7% in curriculum sales conversion rate.

EDUCATION

University of Pennsylvania | Master of Science in Learning Science and Technology

09/2020 – 08/2022

Sun Yat-sen University | Bachelor of Arts in Language and Literature

09/2016 – 06/2020

SKILLS & INTEREST

Cloud&Infra: Google Cloud, NVIDIA GPU HGX/PCIe, Kubernetes, container, VM, networking (NVLink & Infiniband)

AI/ML: GenAI, LLM/VLM, RAG/Vector DB, memory, MCP, multi-modality, vLLM, safety classifiers, MLPerf benchmark

PM: PMP, Agile/Scrum, Jira, A/B testing, PRD, user study, market and competitor research, UI/UX, GTM

Coding: Python, SQL, R, Vibe Coding, APIs, JSON, HTML
